

ABOUT ME

Senior Backend Engineer with strong experience designing, building, and operating **enterprise-scale distributed systems** using **Java, Spring Boot, Apache Camel, and Kafka**. Proven track record in **modernizing legacy platforms**, improving **availability, reliability, and security**, and delivering solutions in **large-scale enterprise environments**. Experienced in **CI/CD pipelines**, **cloud-native platforms**, and mentoring engineers while contributing to architecture and design decisions across the **SDLC**.

EDUCATION

BACHELOR'S IN COMPUTER SCIENCE AND ENGINEERING

Hindustan Institute of Technology and Science /
Chennai /
2018

WORK EXPERIENCE

SINGTEL

Singapore
Sep 2022 - Present

Senior Software Engineer

- Designed and developed **backend services** using **Java, Spring Boot, and Apache Camel** supporting firewall configuration, eSIM provisioning, and router platforms in a **high-availability enterprise environment**.
- Played a key role in **re-engineering and modernizing legacy systems**, improving system reliability and operational stability.
- Contributed to **architecture and design discussions**, ensuring solutions adhered to **security, reliability, and operational standards**.
- Supported **application migration initiatives**, enhancing service availability and deployment consistency.
- Built comprehensive **unit and functional test suites**, reducing post-deployment defects and improving release quality.
- Worked closely with cross-functional teams (product, QA, operations) to iteratively refine requirements and remove ambiguity.
- Mentored junior engineers, conducted code reviews, and promoted **clean code, testing, and CI/CD best practices**.

MPHASIS

Chennai
Mar 2021 - Aug 2022

Software Engineer

- Developed and maintained **Spring Boot and Java-based backend services** integrated with **Kafka**, supporting applications processing **10,000+ monthly transactions**.
- Implemented **OAuth 2.0 and JWT-based authentication**, strengthening application security and compliance.
- Optimized **SQL and NoSQL database queries**, reducing response times and improving system performance.
- Actively participated in **Agile SDLC**, sprint planning, and technical design reviews, contributing to improved team velocity.
- Practiced **test-driven development (TDD)** and pair programming to enhance code quality and team productivity.

INFOSYS

Palo Alto
Nov 2018 - Mar 2021

System Engineer

- Worked on **enterprise insurance platforms**, contributing to UI development and backend service integration using **REST and SOAP APIs**.
- Supported defect resolution and enhancement of complex production issues in mission-critical systems.
- Contributed to **low-level and high-level design documentation**, aligning implementation with architectural standards.

- Assisted in maintaining **security, backup, and redundancy strategies** to ensure system reliability.

SKILLS
